

## Section 2.6 Worksheet: Müller's Method and zeros of Polynomial

1. What is the purpose of Horner's Method?
2. Try to follow the discussion of how to choose the next guess to a root, given that we're going to get two roots from a quadratic.
3. What is "deflation"? (Not the economic problem...;)
4. What are the advantages and disadvantages of Müller's Method compared to Newton's method, or the Secant method?
