

Pre-Service Teachers' Conceptual Understanding of Level of Confidence

Presented by: Bethany Noblitt & Brooke Buckley

In this seminar, preliminary results of a pilot study will be shared. In the pilot study, pre-service teachers completed an assessment inventory comprised of questions focusing on the concept of level of confidence that were designed to highlight common misconceptions about this statistical idea. In this presentation, we plan to highlight common misunderstandings that were evident in the collected responses and to brainstorm teaching strategies to address these misunderstandings.
