

# Friday Seminar

Department of Mathematics and Statistics

When: Friday, March 19, 3:00 p.m.

Where: ST 111

What: Mathematical excursions on the Data of  
Climate Change

Who: Professor Andy Long

*Professor Long will give an overview of some work on global climate change, including a review of the politics, the logic, the conclusions of models, and the data of climate change. He'll also present a modest analysis of some of the data (in particular present day CO<sub>2</sub> data, and historical CO<sub>2</sub>/temperature data). The analysis should be accessible to those with a beginning calculus background, and those with a beginning statistical background.*

Refreshments will be available.
