■ MAT194: "Math In Action" Form

76. T					
1	2	n	n	^	•
1 7	\boldsymbol{a}			┖	٠

Presenter Name:

a.	The presenter has indicated how mathematics has been or is being used in some domain of human society. They certainly hadn't the time to cover all that domain. What other applications of math can you imagine in that area, perhaps spinning off of what the speaker(s) discussed?
b.	To what extent does mathematics enhance (or destroy!) the area discussed?
c.	What question would you like to ask our speaker, or what comments would you share, relative to the domain of life discussed, or to their specific presentation?
d.	Do you see yourself engaging in math in this domain? Could you see yourself encouraging others to do so? Do you have a story to share about your own adventures with math in this area?
