

If you missed the KYMAA meetings, you're in luck: see

The Fantastic Four!

Yes, that's right: four fantastic talks for the price of one!
(And one is free -- so very affordable.)

Friday, April 19th, 3:05 Rm 461

It's **dragons versus drugs**, with some cipherin' thrown in:

1. Jerod Weber and Amelia Floehr: *Examining the Impact of Dragons in the Real World*
2. Jacob Englert, Alli Zembrodt, and Parker Kain: *Mapping the Opioid Epidemic Using Linear Regression*
3. Holden Wight: *Understanding XAX-1*
4. Emily Frame, Kendra Herweck, and Tyler Labree: *Modeling the Interactions Between Dragons and Their Environment Using Numerical Methods*

Who will win this talk slam? **YOU** will! Free food, as always, and the chance to see our fantastic math/stat majors engage in this epic and fast paced intellectual free-for-all! (It is free for all, after all...). **Be there!**
