Logo

So, my logo is basically 2 separate infinite signs which in our class we have learned that the twist that is the infinity sign is a Reidemeister I move. I chose this logo to represent me because it is like infinity to infinity. And that represents me because I feel like that is how I am with my friends and family and with basketball. I love them from infinity to infinity, forever and ever. And I am very adamant about it and who I chose to love from infinity to infinity. I feel to them that it is pretty evident how much I love them, and they would say that this is a good representation of me.
