

For my logo I wanted to use images and shapes that represented me and my interests. I wanted my logo to reflect the things I do a lot and things that I like to do. The hexagon is my favorite shape and I wanted to make sure I incorporated it into my logo. I added a baseball player because I have played baseball for a long time, and it has always been something I have liked to do and have enjoyed. I continue to play it today and everyday it becomes a bigger part of life. The second part of my logo represents how much I like to listen to music; I listen to music no matter what it is doing because it always helps me focus. I listen to many distinct types of music and always like to mix it up to get a new sound whenever I listen. The third part of my logo is a climber because I like to be outside and outdoors. I like to go out on hikes and runs in the woods because there is lots to see outdoors, and it is nice to see all the things that happen out in nature. Being outside gives me a chance to appreciate all the things that are out there around me. I also chose the climber because it also represents me wanting to travel the world and see all the things the world has to offer. I hope to be able to one day adventure out of the US and see all that there is out there beyond our borders. The last part of my logo represents how much I love to watch and play basketball. I am a big basketball fan, I love to not only play whenever I can but also, I really enjoy watching the NBA and seeing some of the greatest athletes ever make the game of basketball even better than it already is. As a little kid I grew up watching the NBA and to this day it is still a big part of who I am. Overall, my logo is meant to not only represent my interests, but it is also meant to represent me as a person and what things that I care about and like to do. I included things that are not only important to me, but things that I really enjoy doing or things that I want to do and look forward to doing.
