Mathemalchemy Project

This project was a little more difficult than the logo project. It took me a while to figure out a way to tie math to my major. I am an Electronic Media and Broadcasting major. One of the things that we were taught in EMB 140 is the rule of thirds. When filming, you're supposed to divide the camera into nine segments, like a tic-tac-toe board. The rule of thirds reminded me of the golden ratio. I decided to draw a camera to represent my major and my love for film. In the display, I added the golden ratio. In addition to that, I made the drawing one continuous line that goes into my name at the top and circles back around. That turned it into a very complex knot. One that I wouldn't want to try untying.
