The Ol' Pair a Turtles

My logo is two turtles facing each other. This logo relates to me because turtles are my favorite reptile, maybe even my favorite animal of all time. The picture of my logo shows a blue sky behind the two turtles. I think this would be a good logo for a day care or perhaps, bottled water.

This logo is an unknot. One single Reidemeister move (move number 2) would make this just a plain band with no twists. It is not tricolorable. You could only color it with two different colors at the intersections. There is no way to add a third color.
